

Duplex Cardstock for White Ink Printing

Our luxe 120lb duplex cardstock is custom made for each order! This unique look combines 2 cardstocks into 1, which provides a colored canvas of your choice to showcase our extraordinary white ink printing. Having the back side of this amazing cardstock to be a different color than the front allows for contrast and the option of printing colored inks - the color combinations are limitless! Subtle or dramatic, it's up to you!

This is especially nice if you have an RSVP postcard that you would like to have white ink printing on the front - the back side of your cardstock can be a lighter color, which will be easier for your guests to write on.

We look forward to creating something amazing with this one-of-a-kind cardstock - we know you will love it! (Check out the available colors on the next page)

Happy wedding planning,
The Gals at Serendipity
